Information Systems graduate with one year of hands-on experience in UI/UX design, focused on creating intuitive, functional, and user-centered digital products. Skilled in conducting user research, translating research findings into actionable design insights, developing prototypes, and performing usability testing to support design decisions. Experienced in designing mobile applications and web-based systems with emphasis on intuitive navigation, efficient user flows, and consistent user experiences.

Education

Atma Jaya University Yogyakarta – Yogyakarta, Indonesia. **Sep 2022 – Aug 2026**

Bachelor's degree in Information Systems, Faculty of Industrial Technology. GPA 3.28/4.00.

- **Relevant Coursework:** Interaction Design Analysis, Programming Principles, Information Systems Analysis and Design Project, Web-Based Information Systems.

Core Competencies

- **UI/UX & Product Design:** User Interface Design, User Experience Design, User Research, UX Research Analysis, Prototyping, Usability Testing, Mobile Application Design, Web Interface Design, E-Commerce Design, UX Strategy
- **Systems & Analysis:** Information Systems Analysis and Design, Web-Based System Design, Basic Programming
- **Design & Creative:** Interface Design, Photo Editing, Video Editing

Work Experience

RS Umum Medika Sangatta – Sangatta, Indonesia. **Sep 2025 – Mar 2026**

IT Support Intern

- Provided daily IT support by assisting employees with hardware and software issues to maintain smooth operational activities.
- Performed basic troubleshooting for network and computer-related issues by identifying potential causes and supporting resolution processes in coordination with the IT team.
- Supported IT operations and project-related tasks under supervisor direction, including device preparation, system checks, and technical assistance for daily activities.
- Managed the collection, input, updating, and verification of IT data on a regular basis to maintain accurate, organized, and accessible information for the team.

Training

JayJay School – Jakarta, Indonesia. **Jul 2025 – Jul 2026**

UI/UX Designer Bootcamp

- Developed UX strategies based on user needs and product objectives to create more relevant, intuitive, and user-friendly digital experiences.
- Conducted user research to identify user needs, behaviors, and pain points as a foundation for developing user-centered design solutions.
- Analyzed user research findings to generate actionable insights supporting design decisions and continuous improvements to the overall user experience.
- Designed a mobile e-commerce interface with emphasis on intuitive navigation, clear information architecture, and consistent visual design.

Training Project

UI/UX Design Project, JayJay School **Jul 2025 – Jul 2026**

- Designed a mobile e-commerce interface focused on ease of navigation, information clarity, and consistent visual presentation.
- Developed simplified user flows to help users search for products, review product information, and complete transactions more efficiently.
- Applied UI/UX principles to page structures, visual hierarchy, and layouts to create a more intuitive and user-friendly experience.
- Created responsive and user-centered designs based on user needs to support seamless interactions across key application features.

Designing UI/UX and Systems Booking Web Based Aug 2024 – Nov 2024

- Designed the user interface and user experience of a web-based ordering system with emphasis on usability, clear navigation, and visual consistency.
- Structured an efficient ordering flow to help users complete transactions more conveniently and effectively.
- Developed a system structure that supported organized order data management and improved administrative efficiency.

- Applied responsive design and user-centered design principles to create a consistent experience across different screen sizes and devices.

Skills, Achievements and More.

- **Soft Skill:** Analytical Thinking, Creativity, Communication, Problem Solving, Time Management, Adaptability, Collaboration.
- **Hard Skills:** UI/UX Design, User Research, UX Research Analysis, Wireframing, Prototyping, Usability Testing, User Flow, Mobile App Design, Web Interface Design, Responsive Design.
- **Tools:** Figma, Visual Studio Code, CapCut.
